Problem statement- (Only for Cold Calling)

Is _____ there? Hey _____ this is **just** _____ I was wondering if you could help me out for a moment?

Let them answer

Well I'm not quite sure you could yet, I called/stopped by to see if you/your company would be open to looking at any **possible hidden gaps** in your _____ that could be causing you to _____?

If they say, what's this all about or are in your face you say:

Oh I apologize if I offended you, what I do is you know how...(then go into your personalized intro)

Personalized intro- 30 second commercial

Well you know how alot of people/companies, sometimes get frustrated with _____, _____ and _____?

Well what I do is help people/companies like that with _____, _____ and _____. Does that resonate with you/your company or something you might be experiencing?

After a personalized intro you would then go into your Situation questions. *NOTE:* You would ONLY use a personalized intro at a networking event if someone asked you what you do, or you were cold calling. If cold calling you would use this right after the problem statement when they ask you, what's this all about, or who are you again ect? It's not meant to sell them, only to make them curious enough to want to engage in a conversation with you!

Tonality-

- If you down play something... they often will upplay it.

Stress? (ask in a question and they expand)

Verbal Cues lead into your next questions every 10-15 seconds..

How to Connect- Connecting Questions (takes the focus off you, and puts it on them)

If they say YES:

Oh, what do you like about it?

Is there anything else you like about it?

Two truth- (*nobody likes 100% of what they do or have*)

So to me it sounds like things are going fairly well for you. Is there anything you would change about your (present situation), if you could?

Why would you change that?

Why is that important to you now though?

If they say no I don't like it:

What don't you like?

So I'm curious what is it about your _____ that you don't like? *Copyright*

2020 7th Level Communications, LLC

If they expand on what they don't like:

Clarifying questions:

What do you mean by that? How do you mean by that?

Probing questions:

How long has that been going on?

Has that had an impact on you? In what way though?

If they are in the middle; hmmm and haaaaa

You don't sound so sure about it.....what don't you like?

Ok well let's do this, just so I can see the rationale behind why you might be looking for _____(plug in what they said they are looking for)

Besides _____ and _____(plug in what they have already told you)..... what's the main reason why you might be looking for _____..... Rather than.....?

Solution Awareness Questions - (Involves your potential customers and their ideas which strengthens the benefits of them changing their situation with your solution)

Before we started talking today, have you been out there looking for _____(plug in what they said they wanted) so you can _____(plug in the result they told you they wanted) ? Or what have you been doing about _____(plug in what they wanted)?

If they say no:

What's prevented you from doing that in the past?

If they say yes:

What did you do?

How did that work out?

What kind of results did you get from it?

What do you think held you back from having success.....?

Not good results:

Do you know if other people were getting results from that? - Why do you think others were able to get results, but you didn't? **OR** - What do you think held you back from getting the kind of results you wanted at that time?

If they didn't get started with anything else:

What prevented you from getting started with that?

#36 -37

Let's do this... just to make sure that what we're doing could actually help you... besides _____ and _____ (plug in what they have already told you they want) what would you actually be looking for..... ? - Like what would be your ideal criteria?

- Can I ask why that's important to you now though? -
Is there anything else you're wanting?

So if we were able to help you solve this _____(plug in the problem they said) what would that do for you? (logical answers)

What would it do for you personally though? (emotional question)

OR

How would it be different though, you being able to _____, (plug in what they said they wanted) how would your life be different than it is now?

How would that make you feel though? (emotional question)

OR

How do you see the benefits of you actually solving this problem?

Consequence Questions- (*Helps your prospect question their way of thinking and explores the consequences of not solving the problem*)

Transition Formula- (Transition into presenting your solution)

Presentation Stage – (Demonstrates How the specific advantages and benefits of what you sell will Solve their problem)

Copyright 2020 7th Level Communications, LLC

For EACH of you, you will have various ways to give your presentation, based on if you do a One call close, a Two call close, or more of a complex sale where it requires several appointments. Please base your presentation off your industry.

Below is a small example of how to Bridge in for a One Call close:

Example if you sold Business training/coaching:

Remember when you said that you want to be able to scale the business and have more time to be with your family? (repeat back what they said they wanted) and right now (repeat back what they said their logical problems were) you are having to work a lot of hours because you are

having to do most of the work, which is causing you to be away from your family?

With your permission I can go over a few things that we **might** be able to do for you to help you with your situation, to solve those problems

Go over 3 STEP Formulas.

Either repeat back their problem or you can start off like this:

1. **One of the biggest problems that people have when they are....**(plug in what they are trying to accomplish) is that they don't know how to (plug in what they don't know how to do, or a big problem that most prospects have)

Copyright 2020 7th Level Communications, LLC

2. **So the way we solve that for our clients like you is we....**(go over how your product, service, program solves this part of the problem)
3. **And what they means to you is.....**(repeat back the advantages and benefits of what it will do for them or mean for them once its solved)

Present the various products as you normally do, except present them here now, not as they come up like you usually have!

Checking for agreement questions

Does that make sense?

Are you with me?

Are we on the same page?

What are your thoughts on that?

How does that make you feel?

How do you see this helping you the most?

Do you see how this could help you?

Is there anything else I should add?

Ask a Qualifying question at the end of the presentation:

Spousal Support

Hold on.. How does your *wife/husband* feel about you having the right skills to make sure that your business does \$_____ in the next 12 months?

Okay, well what are you going to do if they don't want you to invest in the program so that you can get to that level financially in the next 12 months? • Well, how are you going to get there if you don't have these skills?

Money Concern:

Tell me if you did have the funding, is this something that would work for you? • Why do you feel it would though?

Okay so I can appreciate that money might be an issue from what you told me. How do you think you can resolve that where you can find funding to get the training and coaching to actually get you where you want to go with your business? (Let them come up with ways)

If they can't come up with ways:

- What other avenues do you have to find funding to get your business up to \$xxx in the next 12 months? (plug in what they want)

If they still can't come up with ways:

Copyright 2020 7th Level Communications, LLC

- Can I make a suggestion?
- Have you ever considered putting it on a credit card or paypal credit and just paying it off with the extra profits you make in your business from the training here?

If they ask about pricing early in the game::

Yeah, I mean, I'm assuming you understand to get this type of training for marketing, it's going to take capital or credit to invest to get your business to that level. How much funding do you have to put into marketing to get your business to the \$xxx,xxx level

Okay, well with this you'd need about \$7000 or so to put in to be able to profit from it once you get it going. Is that something you can come up with if it fits into what you are looking for?

If they have less than that...

Well I will tell you with this you'd need to put it about \$7000 or so to get to that level. Is that something you can come up with if it fits into what you are looking for?
